

# 2003-2004 CLIDE Award

## Public Planning and Policy Leadership Award

### Dallas/Fort Worth International Airport

The Dallas/Fort Worth International Airport Board's commitment to achieving development excellence as the standard throughout DFW Airport has resulted in a cadre of projects that exemplify the principles of development excellence that include environmental stewardship, quality places, and resource efficiency.

Examples of leading edge initiatives include:

- the DFW International Airport Commissioning Policy that focuses on efficient and effective use of building systems and energy efficient environments;
- the construction of projects designed to maintain the water quality standard in the receiving waters surrounding DFW Airport;

**The DFW Airport for demonstrated commitment to and achievement of the principles of environmental stewardship, quality places, and resource efficiency.**

**CLIDE Award Jury**

- the construction of energy improvements, specifically in relation to the new International Terminal D construction and redevelopment of the DFW Airport Central Utilities Plant; and
- the quality place and pedestrian friendly plan of the International Terminal D Public Arts program.

**Participants:** Dallas/Fort Worth International Airport ■ Austin Commercial

## Celebrating Leadership in Development Excellence (CLIDE) Awards Program, 2003-2004

acknowledges regional excellence by recognizing projects and practices that exemplify one or more of the 10 Principles of Development Excellence.

Public and private entities throughout North Central Texas were invited to submit an entry for a CLIDE Award. Entries were separated into four categories, including:

- **Raising Public Awareness**, projects that educate the public or raising awareness of development related issues
- **Public Planning and Policy**, programs or policies that facilitate and promote principles of Development Excellence
- **Redevelopment**, development within older, established communities that successfully re-use existing structures and/or rebuild
- **New Development**, projects constructed on a previously unbuilt site

Close to 50 applications were received for CLIDE Awards. Of those, the CLIDE jury unanimously selected nine projects to receive Leadership Awards. Leadership Awards are given to projects that exemplify one or more of the "10 Principles of Development Excellence" and serve as examples of quality development practices in North Central Texas. From these nine winners, the jury again reviewed the entries to select winners of the Landmark Awards, the "best of" category, announced at the North Central Texas Council of Governments' General Assembly on June 6, 2003. The Landmark Award is given to projects that have gone above and beyond the theme of development excellence.

The "10 Principles of Development Excellence" have been designed to address the many issues that will impact the region as its population grows including, but not limited to, transportation, air quality, water supply, and the environment. The Principles include:

- **Development Options**, provide a variety and balance of development options and land use types in communities throughout the region
- **Efficient Growth**, foster redevelopment and infill of areas with existing infrastructure and promote the orderly and efficient provision of new infrastructure
- **Pedestrian Design**, create more neighborhoods with pedestrian-oriented features, streetscapes, and public spaces
- **Housing Choice**, sustain and facilitate a range of housing opportunities and choices for residents of multiple age groups and economic levels
- **Activity Centers**, create mixed use and transit-oriented developments that serve as centers of neighborhood and community activity
- **Environmental Stewardship**, protect sensitive environmental areas, preserve natural stream corridors, and create developments that minimize impact on natural features
- **Quality Places**, strengthen community identity through use of compatible, quality architectural and landscape designs and preservation of significant historic structures
- **Transportation Efficiency**, develop land uses, building sites, and transportation infrastructure that enhance the efficient movement of people, goods, and services
- **Resource Efficiency**, provide functional, adaptable, and sustainable building and site designs that use water, energy, and material resources effectively and efficiently
- **Implementation**, adopt comprehensive plans and ordinances that support Development Excellence and involve citizens and stakeholders in all aspects of the planning process
